SayIt™ FOR YOUR ORGANIZATION

Make EHRs easier for everyone.
RIGHT NOW, EVERY DAY.

You hoped the promise of the EHR would make your providers more productive.

It didn't. Instead, they are spending more time on clinical documentation, and less time with their patients.

What if your providers could save 25% or more of clinical documentation time each day?

With SayIt from nVoq, that's not wishful thinking. It's a reality!

Here's how:
1. Spoken narratives are converted to text in real time - directly into the system of record – no integration required!
2. Using voice or touch shortcuts, templates can be quickly completed in seconds vs. minutes.

The result: more timely, accurate and quality documentation – at a fraction of the cost of competitive offerings.

SayIt Advantages

- Affordable monthly and yearly subscription pricing includes all maintenance and technical updates
- Access anywhere there's an Internet connection
- SayIt is hosted securely in a HIPAA-compliant US data center
- Compatible with both PC and MAC – no need to purchase separate products

Easy To Learn and Use:

- No voice samples to read – providers can be productive within minutes
- Works directly with any EHR, RIS, PACs or other documentation system
- Dedicated hotkeys simplify toggling between dictation and shortcuts
- Automation tools keep complex workflows on track with simple voice or touch commands

Reduce IT Overhead

- No hardware to purchase or maintain
- No software to install on the desktop
- No maintenance costs
- Centralized administrative portal simplifies end-user management at no extra charge

Optional Value-Added Services Enhance Workflow:

- SayIt Transcription Assist service can edit and post dictations to the EHR for providers needing extra assistance
- SayIt Code Fast creates structured, coded data at the point of care or downstream staff

SayIt. The sensible speech recognition alternative. Contact us now at: 330-686-8628 or sales@dynamicdatainc.com to get started with a no-obligation trial.
